

PRESS RELEASE

**FUTURESENTRY HONORED WITH
2011 ASIS ACCOLADES AWARD**

*The FutureSentry First Responder named a top winner
in annual competition presented by ASIS International*

Miami, Fla. – Sept. 6, 2011 – [FutureSentry](#), a developer of automated detection technologies, was honored as a winner of ASIS Accolades for the FutureSentry First Responder. The judges chose the innovative technology as a top 10 winner in the competition, which included numerous entries from leading technology providers. The ASIS Accolades competition recognizes the security industry's most innovative new products and service solutions exhibited at ASIS 2011. The awards will be presented at the Networking Luncheon at ASIS on Monday, September 19, 12:00 – 1:30 p.m., in the Valencia Ballroom at the Orange County Convention Center.

“We are honored with this recognition from ASIS and look forward to demonstrating the unique attributes of our system at the conference,” said Rolland Trayte, President and COO, FutureSentry. “We are committed to developing technologies that automate security functions to enable security personnel to focus on more critical tasks and prevent crime before it stops. This award demonstrates the interest in automated systems to help make security teams more effective.”

The FutureSentry FirstResponder, is an automated perimeter detection solution that mimics the actions of a security guard to prevent crime before loss or damage occurs. By leveraging advanced motion detection technology, it automatically identifies potentially dangerous targets within 1,000 feet, and tracks objects to deter criminal behavior. Once it detects motion in a user-defined area, the system illuminates activity with a high-intensity LED light and continues to guard the area until no activity is present. When integrated with IP or analog surveillance cameras, the solution captures valuable video evidence for forensic analysis. It can also be combined with a variety of security edge devices.

To view the robust capabilities of the FutureSentry First Responder and meet the experienced entrepreneurial team behind the technology, visit booth #2178 at the ASIS International Seminar & Exhibits in Orlando, Fla.

ABOUT FUTURESENTRY

FutureSentry was founded on the belief that innovative technologies can prevent and deter potentially criminal activity before loss or damage occurs, and is proven to reduce criminal activity in high-risk areas. The FutureSentry technology is used to enhance

security in the government, commercial, transportation, education, correction and critical infrastructure markets, and is distributed worldwide by a networked of authorized resellers. FutureSentry is a Communicated Enforcement LLC brand.
